Gary - FYI below. We will do a visual inspection on Monday if water levels are near normal.

Thanks,
David

Subject: San Jacinto - Friday Inspection

Good morning,

Things are looking much better at the Site. When I drove by this morning, I could see small portions of the interior of the Western Cell. The access roads are almost fully dry as well, so I'm assuming they'll remove the cones and barriers at the I-10 exits in the next few days. Should Daleel and I plan to do the visual inspection on Monday?
